Dinesha Dayananda	11-01-2022	0.2	Added flowcharts

Overview

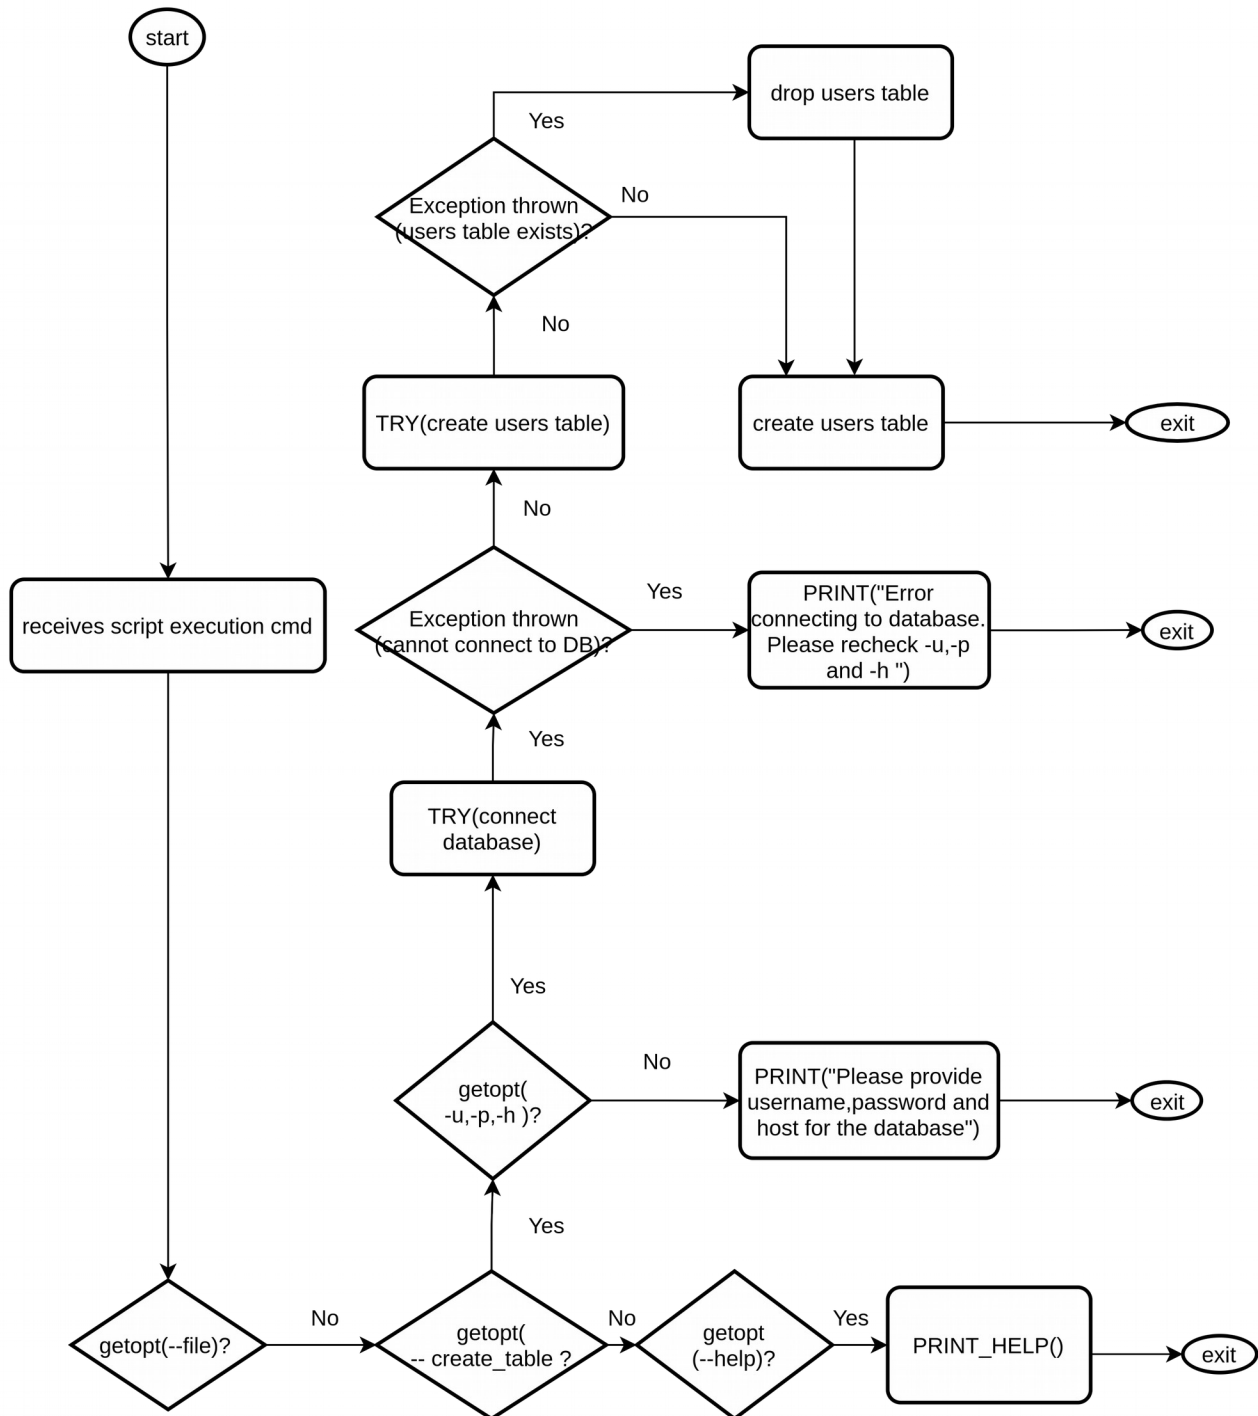

This Design document for the PHP script to upload users includes the flowchart of the entire process that is supported by the script. The flowchart is broken down to two main sub processes to make it more readable.

The two main processes are:

1. When the CSV file is not provided to the PHP script
2. When the CSV file is provided as an option to the PHP script.

Flow Charts

When the CSV file is *not* provided as an option to the PHP script

When the CSV file is provided to the PHP script
